

# GEORGE DAVIDSON CROCOSMIA

## CROCOSMIA X CROCOSMIFLORA 'GEORGE DAVIDSON'

BEAUTIFUL IN BOTH FORM AND FLOWER, GEORGE DAVIDSON CROCOSMIA IS A RELATIVELY RARE GOLDEN YELLOW FORM OF WHAT IS MORE OFTEN SEEN AS A RED OR ORANGE FLOWER. THE LONG STRAPPY LEAVES EMERGE IN SPRING FROM CORMS BENEATH THE SOIL, PRODUCING BLOOMS IN MIDSUMMER. THE FLOWER FORM IS REMINISCENT OF FREESIA, BUT MORE DELICATE AND GRACEFUL. HIGHLY ATTRACTIVE TO HUMMINGBIRDS, CROCOSMIA ALSO MAKES AN EXCELLENT, LONG LASTING CUT FLOWER. PRODUCES OFFSETS EACH YEAR, MAKING ONE PLANT INTO MANY. EASILY DUG AND TRANSPLANTED IN FALL OR EARLY SPRING, ALLOWING YOU TO INCREASE YOUR PLANTINGS OF THIS LOVELY, LONG-LIVED, CAREFREE FLOWER.
