

BROWN TURKEY FIG

FICUS CARICA 'BROWN TURKEY'

ONE OF THE MORE FROST-TOLERANT OF FIGS, BROWN TURKEY IS AN HEIRLOOM VARIETY THAT PRODUCES TWO CROPS PER SEASON OF RUST BROWN TO PURPLE FLUSHED FIGS. IDEAL FOR AREAS WITH HOT SUMMERS, FIG TREES ARE ADAPTABLE TO EVEN THE MOST "MEDITERRANEAN" OF CLIMATES. BROWN TURKEY REDUCES THE POTENTIAL OF WINTER DAMAGE, BEING A FULL ZONE HARDIER THAN MOST. IT ALSO TENDS TO BE ONE OF THE LARGER GROWING VARIETIES, REACHING 20-25' TALL AND WIDE. THE AMBER FLESHED FIGS IT PRODUCES ARE DELICIOUS FRESH OR DRIED, MADE INTO JAMS, AND ARE DELICIOUS ADDED TO SALADS AND SANDWICHES. SELF FRUITFUL, AS ARE ALL FIGS, AND NOT EVEN DEPENDENT ON POLLINATORS! NOW THAT'S PERMACULTURE! TOLERATES DROUGHT WHEN NECESSARY AND IS RESISTANT TO THE BROWSING OF DEER TO BOOT.

ZONES 7-11
