

SOFT RUSH JUNCUS EFFUSUS

WITH A VERTICAL DISPOSITION TO BEAT THE BAND, RUSHES ARE AN UNDERESTIMATED PART OF THE GARDEN. THOUGHT THEY HAVE NO SHOWY COLORS, BEYOND EVERGREEN, THEY ADD A LINEAR ACCENT THAT WON'T BE BEATEN LIKE MANY GRASSES UNDER DURESS. WITH A CLEAR PREFERENCE FOR WET, OR EVEN SOGGY, SOILS, SOFT RUSH TOLERATES SOILS THAT ARE SEASONALLY VERY SATURATED AND DRY OUT DURING THE SUMMER SEASON. GROWING 4' HIGH BY 2-3' WIDE, IT WILL PUNCTUATE JUST ABOUT ANY PLANTING. SUITABLE AS A POND MARGINAL, BUT ALSO IN TYPICAL GARDEN SOIL, SOFT RUSH IS A SURVIVOR ENTIRELY DEER RESISTANT AND LOVELY LIT BY THE SETTING SUN, THEY PROVIDE EROSION CONTROL AND ARE SUITABLE FOR RAIN GARDENS AND SEASONALLY FLOODED AREAS. CALIFORNIA NATIVE.
