

# CREeping GOLDEN MARJORUM

## ORGANUM VULGARE 'AUREUM'

CREeping GOLDEN MARJORUM MAKES A LOVELY, GLOWING GROUNDcover THAT IS BOTH DROUGHT-TOLERANT AND DEER RESISTANT. USED IN PARTIALLY SHADY PLACES OR AS A CONTRAST PLANT, ITS GOLDEN FOLIAGE BRIGHTENS AND ENHANCES JUST ABOUT ANYTHING AROUND IT. TRY IT PLANTED OVER BULBS, ESPECIALLY THOSE WITH BLUE OR RED BLOSSOMS, FOR A VIVID SHOW. GOLDEN OREGANO IS QUITE SHADE-TOLERANT BUT WILL BECOME MORE GREEN IN A LOT OF SHADE. IT IS EDIBLE AND THE MILD FLAVORED GOLDEN LEAVES AND PRETTY FLOWERS CAN BE USED FRESH IN SALADS OR SPRINKLED ON JUST COOKED PIZZA FOR A TASTY-TREAT.

PARTIAL SHADE
