

TURBO THYME

THYMUS LONGICAULIS

A VIGOROUS GROUND COVER, TURBO THYME IS A PROSTRATE PLANT THAT GROWS QUICKLY TO COVER BARE SPOTS. STAYING UNDER 3" HIGH AND ROOTING AS IT SPREADS, IT CAN GROW AS MUCH AS 2 FEET PER SEASON. THE SHINY FOLIAGE IS AROMATIC AND FILLS THE GARDEN WITH ITS HERBY FRAGRANCE WHEN STEPPED ON OR BRUSHED. THE PRETTY, ROUNDED CLUSTERS OF PINK BLOSSOMS ARE ATTRACTIVE TO BEES AND BUTTERFLIES WHEN THEY APPEAR IN SPRING, AND ARE MORE SUBSTANTIAL AND SHOWIER THAN THOSE OF MOST THYME VARIETIES. DROUGHT AND HEAT-TOLERANT, DEER RESISTANT, AND HARDY, IT MAKES A VERY NICE BULB COVER OR LAWN REPLACEMENT.
